Please add this to that legistar item about trees on the smc agenda

Thanks

Jeanne

Dear Members of the Sustainable Madison Committee,

We are a collection of residents from neighborhoods from across Madison working to support the preservation and replanting of canopy trees in our urban forest.

A number of our members have been following the process of the Sustainable Madison Committee's Tree Working Group through their eight months of work.

We heartily support the recommendations the group concluded their work with contained in the "SMC Tree Workgroup Paper Final Draft 4-10-17": document which is item number 8 on the agenda of your upcoming meeting under Legistar number 44959.

thank you for your good work,

Madison Canopy Street Trees Group
