Subject: Garver #31 at BPC

Greetings -

I wanted to send a note expressing my support for the development agreement between the city and Garver Feed Mill LLC. The finish line is in sight!

I hope the BPC will support the agreement including the new additional borrowing for the city to meet its long stated obligation to clean the site and close the DNR case.

The city will get a fantastic reuse of a historic property. OBS will get new storage. The developer has kept their promise to seek various tax credits and grants.

My constituents remain excited about the proposed food production facilities and microlodges. I think the entire city will benefit from the investment into the building and land.

Thank you for your support.

Marsha
