Materials Used in the Street Facade	Parcels Zoned for Mixed-Use, Commercial and Residential Uses. Any new structures on parcels zoned for mixed-use and commercial use that are located within two hundred (200) feet of other historic resources shall be visually compatible with those historic resources in the following ways: The materials used in the street facade(s).		
Façade Design	The materials used in the street facade(s).		Street facades shall be modulated with setbacks incorporated into the design at the first floor level. The entrance shall either be inset or projecting from the plane of the main facade. Porches on main entrances are encouraged. Street facades shall reflect the rhythm and directional expression of pre-1930 structures within two hundred (200) feet of the subject property.
Materials, Patterns and Textures	Parcels Zoned for Residential Uses. Any new structures on parcels zoned for mixed-use and commercial use that are located within two hundred (200) feet of other historic resources shall be visually compatible with those historic resources in the following ways: Materials, patterns and textures	Materials for the exterior walls shall be the same as or similar to materials prevalent in the University Heights Historic District. Permitted materials include brick, narrow gauge horizontal clapboards four or less inches in exposed width, stone, stucco, smooth shingles or combinations of the above provided the combinations occur in a manner and location similar to the materials on existing structures in University Heights (e.g., brick on first floor with clapboard on second floor). Other materials, such as aluminum or vinyl must be visually compatible with structures within two hundred (200) feet of the subject property. The following materials are prohibited: concrete block, asbestos, wide clapboards over four inches in exposed width, diagonal	

	boards, vertical boards, rough sawn wood,	
	rough split shingles, shakes.	
Architectural Details	Tough spilt stilligies, stiakes.	
		Poofing materials shall be asphalt shingless
Roof Materials		Roofing materials shall be asphalt shingles; fiberglass or other composition shingles similar in appearance to multi-layered architectural shingles or 3-in-1 tab; or Dutch lap, French method or interlock shingles. Sawn wood shingles may also be approved. Thick wood shakes are prohibited. Vents shall be located as inconspicuously as possible and shall be similar in color to the color of the roof. Rolled roofing, tar-and-gravel, rubberized membranes and other similar roofing materials are prohibited except that such materials may be used on flat or slightly
		sloped roofs that are not visible from the ground
Siding Materials		Narrow gauge clapboards made of wood, composite wood material, or concrete, and/or brick and stone may be permitted. Stucco and split-faced concrete block may be permitted only as trim, rather than the primary siding material. Stucco panels and pebble dash are prohibited. If the first two floors of a proposed structure are masonry, the Landmarks Commission may permit the use of artificial siding (i.e. vinyl or aluminum) on the upper floor or floors. In such circumstances, the artificial siding must conform to the following requirements: 1. The material shall be of the highest grade offered by the manufacturer. 2. The material shall have a minimum gauge of .042. 3. The color and sheen of the siding shall be consistent with those used in the era in which adjacent structures were constructed. 4. The siding shall not have a false wood grain. 5. The width of each apparent clapboard shall not exceed four (4) inches.

		1	1	
				6. The use of visible j-channel trim and
i				other prefabricated elements that differ in
				appearance from those used on historic
				structures in the neighborhood is
				prohibited.
Windows and Doors				The proportion of width to height of doors
Williadws and Doors				
				and windows and the proportion and
				rhythm of solids to voids in the front and
				side facade designs shall be similar to pre-
				1930 structures within two hundred (200)
				feet of the subject property. Windows
				trimmed with bead molds similar in design
				to other pre-1930 window trim in the
				district and windows and doors shall be
				inset at least one (1) inch from the exterior
				trim. The main entrance to the structure
				shall be on the front facade. Garage doors
				shall be located on the side or rear facades
				whenever feasible. If it is not feasible to
				locate the garage door on the sides or rear
				facades, one-car garage doors will be
				permitted on the front facade.

Accessory Structures			
Accessory Structures Accessory Structures	2 d z ir p e E t	Accessory structures, as defined in Section 28.211, MGO, shall be compatible with the design of the existing structures on the zoning lot, shall not exceed fifteen (15) feet in height and shall be as unobtrusive as possible. No accessory structure shall be erected in any yard except a rear yard. Exterior wall materials shall be the same as those for construction of new principal structures as set forth in Sec. 41.24(4)(a)2.	Accessory structures shall be compatible with the design of the existing structure on the zoning lot, shall not exceed fifteen (15) feet in height and shall be as unobtrusive as possible. Accessory structures shall be erected in the rear yard. If the structure on the lot is sided in wood or stucco, the siding on the accessory structure shall match the appearance of the siding on the structure. Imitation siding materials that approximate the look of the siding on the structure, such as vinyl, aluminum or applied stucco-like surfaces, may be approved. If the siding on the structure is brick, the garage may be sided in brick to match, clapboard, stucco, narrow-gauge vinyl or aluminum or applied stucco-like surfaces. Garage doors shall blend with the historic appearance of the neighborhood. Horizontally paneled doors and flat paneled doors are prohibited. Windows shall be either casements or double-hung units of a similar proportion to the windows on the structure. Alteration of existing accessory structures shall comply with this subdivision (e) and with subdivision (d) above. The roof shape may be a hip or gable of any pitch; single slope roofs are prohibited. The roof material shall match as closely as possible the color and appearance of the roof material on the structure.
