Subject: Bird Safe Glass--Especially in the isthmus

Date: Mon, Mar 25, 2019 11:38 AM

Dear Alders

I love the elegance of the proposed Archipelago Village on E. Washington. I wanted to share how very important it is that bird safe glass is used, especially in an isthmus, between 2 lakes. This is a bird rich environment. As the City of Madison Comprehensive Plan says (paraphrased).....let's minimize bird strikes/bird mortality.

Mr. Brink pledged to address the issue at the neighborhood Preservation and Planning meeting. I look forward to a bird safe design.

Respectfully

Anne Walker
