NOTES:

- 1) All lots within this Certified Survey Map (CSM) are subject to public easements for drainage purposes which shall be a minimum of six (6) feet in width measured from the property line to the interior of each lot. For purposes of two (2) or more lots combined for a single development site, or where two (2) or more lots have a shared driveway agreement, the public easement for drainage purposes shall be a minimum of six (6) feet in width and shall be measured only from the exterior property lines of the combined lots that create a single development site, or have a shared driveway agreement, except that the easement shall be twelve (12) feet in width along the perimeter of the plat. Easements shall not be required on property lines shared with greenways or public streets. No buildings, driveways, or retaining walls shall be placed in any easement for drainage purposes. Fences may be placed in the easement only if they do not impede the anticipated flow of water. In the event of a City of Madison Plan Commission and/or Common Council approved redivision of a previously subdivided property, the underlying public easements for drainage purposes are released and replaced by those required and created by the current approved subdivision.
- 2) All lots created by this CSM are responsible for compliance with Chapter 37 of the Madison General Ordinances in regard to storm water management at the time they develop. A Declaration of Conditions, Covenants and Restrictions for Maintenance of Stormwater Management Measures and a stormwater management plan shall be review and approved by the City Engineer and the Declaration recorded at the Dane County Register of Deeds prior to development within this CSM.
