1	I would like more flexibility within the website. I want to target neighborhoods or topics and not have it sent to everyone.	6/13/2019 5:35 PM

Q3 How satisfied are you with the ease of use of the alder tools available through the Council website:

Q4 What aspect(s) of the alder blog needs improvement, in your experience?

Answered: 7 Skipped: 2

#	RESPONSES	DATE
1	The preview function barely resembles what is actually posted. If that the preview resembled what is published, at least there would be predictability. The tools for formatting text are primitive and difficult to understand.	6/16/2019 8:43 PM
2	Ease of use and ability to have some weekly info that is curated for all alders instead of each creating our own content	6/15/2019 6:04 PM
3	Visual readability - Ease of posting information ie maps, visuals, Irganuzatiin. Correcting errors.	6/14/2019 10:37 PM
4	flexibility	6/13/2019 5:35 PM
5	Ability to edit html, ability to have analytics for tracking site visits and email clicks, preview that actually looks like what the live message will look like, more flexibility in embedding tools. Ability to create sub-audiences to receive messages specific to topics, ability to see our email list and add to it, the bugginess with losing drafts needs to be fixed--I'll hit the "save for later" button and lose my work. I always initially create my message in a Google doc and then paste it, but this is still very frustrating as I'll still make changes after pasting the content in and will lose my work.	6/13/2019 3:05 PM
6	No functioning preview/WYSIWYG No autosave Logs out for 'inactivity' (even when activity working on it) No html option No good analytics Limited formatting (no underlining or centering) No copy forward/template options	6/13/2019 2:42 PM
7	Formatting flexibility. Display options. ability to share already posted data.	6/13/2019 2:16 PM

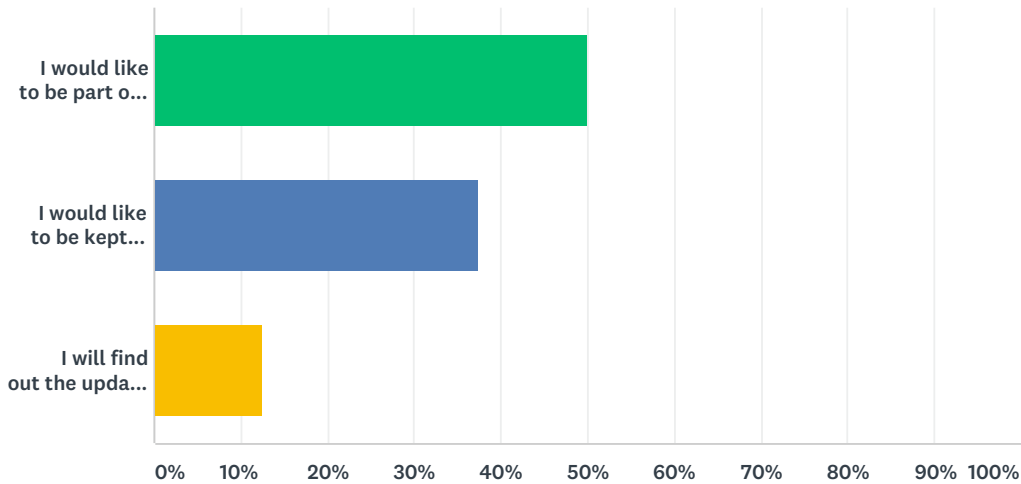

Q5 What other areas of communication would you like CCEC to take up for consideration?

Answered: 7 Skipped: 2

#	RESPONSES	DATE
1	It could be helpful to be provided with ready-to-go and formatted alder blog content. Each alder could alter that, combine with other content, etc., but it would make digesting the many press releases and general emails that we get that are post-worthy easier to utilize.	6/16/2019 8:43 PM
2	Overall communication strategy and how council office can lead with creating overall communication	6/15/2019 6:04 PM
3	immediate sharing of critical information that has city wide impact. General posting of weekly meeting schedules.	6/14/2019 10:37 PM
4	I think we should create a project management system with outlook so the Alders can set the reminders and see the progress of each constituent complain. Using software like Jira can improve the productivity of Alders	6/14/2019 11:02 AM
5	Social media--I'd like to discuss the Facebook policy, also options for using livestream, webinars where people can join meetings remotely and "chat" comments or questions, and then posting these recordings on our blog after. :D	6/13/2019 3:05 PM
6	Calendars, Meeting Schedules, Legistar, incoming communications (email sent to alders), city news/updates	6/13/2019 2:42 PM
7	Improved tools	6/13/2019 2:16 PM

Q6 A small group of alders plan to work with City staff to investigate the options and alternatives for communication technology improvements. What level of involvement would you like to have:
