Revision of plans:

As is often the situation, as a project moves along, changes get made along the way. Recently it was decided to modify the size of the combined garage project with the left side (Anderson/Eisele 462 N. Baldwin) decreasing to a footprint of 18' wide by 26' deep reducing the square footage to 468 sq. ft. (originally it was 528 sq' ft.).

In reducing the overall size it lowered the overall height of the roofline slightly and changed the design to a single car garage door and an entry door on the front of the building.

The right side unit (Squitieri 466 N. Baldwin) remains unchanged other than the slightly reduced roof pitch (changed to 8/12 pitch from 10/12 pitch).

Thank you for your consideration.
