

IPM Current Practices Survey 2018

Demographics

41 Total Respondents

16 Division or Department Heads (D/DH)

10 IPM Coordinators /Administrators

16 Staff Applicators

2 Third Party Vendors

In a number of questions, staff appears to have responded under both IPM Coordinator and Staff Applicator roles, so although our total is correct, specific numbers for questions may be listed under and incorrect identifier. Percentage totals seem unaffected by this potential duplication.

KEY FINDINGS:

Most concerning pests

Division / Department Heads

Rodents, Plant diseases and Invasive species

IPM Coordinators

Plant diseases and Invasive species

Staff Applicators

Disease carrying insects and Invasive species

Satisfied with pest control used
