

THE MASTER PLAN WORKS

In addition to the practice field, here is a sample of elements controlled by the current Master Plan that contribute to public health, safety and welfare.

DATA POINTS DERIVED FROM EDGEWOOD CAMPUS MASTER PLAN SEPTEMBER 22, 2014

GATE CLOSURES

1. Gates on secondary streets closed evenings, weekends, school breaks and holidays
2. All 3 schools encourage students, parents, guests, outside organizations to access campus from **one main entry** off Monroe street

NEIGHBORHOOD HOUSES

3. The College will not use houses they own for traditional undergrads nor turn properties into student housing
4. Properties will be maintained in manner consistent with requirements imposed by the city

PUBLIC ACCESS TO LAKE WINGRA

5. Shore lands accessed with pathways for **campus and public use**
6. Edgewood installs and maintains boardwalks that are used by the campus and the **public** for educational and recreational purposes

TRANSPORTATION MANAGEMENT PLAN

7. Subsidized Madison Metro bus passes for students
8. Incentives for faculty, staff and students to bike or carpool to campus
9. Shuttle buses to State Street 4 nights/week so students don't need to drive

STORMWATER MANAGEMENT

10. Central drainage corridors
11. Isolated drainage basins
12. Catchbasins with sumps
13. Grass swales to infiltrate and filter runoff
14. Rooftop runoff routed to penetrable surfaces

THE MASTER PLAN WORKS

These projects exemplify how the current streamlined Master Plan public process works for Edgewood Campus, the city, and the neighborhoods. Prior to choosing to engage in the Master Plan process, Edgewood campus projects involved constant opposition and negotiations with the neighborhood associations, Plan Commission, Urban Design Commission, Traffic Engineering, and Common Council. This entailed numerous attendance at dozens of meetings.
