Subject: ideas for land parcel

I would encourage you to support the plan to develop the proposed wild area for plants, animals and children to explore. I was lucky enough to be raised in the country on a small farm. I picked wild berries, listened to meadowlarks watched the yellow zig-zag spiders that live in the tomato patch. Experiencing wildlife was the best thing to happen in my life. I now garden for wildlife and share the information.

Please help.
Sincerely
Marcia Geiger
