

Letter of Intent for Garage at 1023 Emerald Street Madison, WI 53715

We intend to replace our current 14' x 22' garage with a newly built 24' x 37' detached garage. The garage building will include a new reinforced concrete floating slab, 8' walls and Vinyl Siding to match the house. The project cannot be scheduled with the contractor, American Garage Builders, until a permit is issued. Once approved and on the schedule, the proposed building should be completed within a week's time. It is our hope and intention to have the project completed this summer.

*We are not requesting any subsidies.*
