Message:

I saw in your recent City Council email that there was a mention of Spaanem Ave getting stop signs due to the high volume of speeders. What are the chances that this could also include Turner Ave. Even with 2 stop signs on the street people just fly through to the main streets. It's been an ongoing issue since the new curb and gutter was put in. With the previous alder nothing was done and I think neighbors on the street gave up on the issue. We felt that we were just given lip service over it. We realize that reporting it to the police is just not realistic, given the much larger issues that are effecting them currently.
