

12/8/20

I am applying for a conditional use permit for a garage. Per code, a garage is only allowed to be 10% of the lot size. My lot size is 4,500sf, which would limit me to build a 450sf garage. I am wanting to build a 22x24 foot garage, which would be 528sf. I am planning to match the shake siding of my house and to have the roof pitch match that of my house. My intention is to have it look like it was built the same time as the house with the same architectural style.
