**RE: Tesla Charging Station Installation at 675 S. Whitney Way [Madison, WI]**

Dear Madam or Sir,

I have previously been in touch with your office regarding the Tesla charging station project at 675 S. Whitney Way.

Tesla is adding 8 electric vehicle charging stations for Tesla motor vehicles to 8 existing parking stalls. Their equipment will be placed adjacent to the parking spots, in the southwest corner of the parking lot. The proposed location of these stations is in the south end of the parking lot of the Hy-Vee at 675 S. Whitney Way, west of the Westgate Mall Road entrance off of Odana Road.

Per conversations with the landowner, this location was selected due to it being a less used area of the parking lot and to minimize disruption to existing customer parking habits. A landscaping plan, per the accompanying drawings, is being implemented to minimize the visual impact of the installation.

It is Tesla's intention to begin construction early-to-mid 2021.

For more information of the equipment used in this installation please go to: <https://www.tesla.com/supercharger>

Please **email**, **fax** or mail any correspondence related to this application to:
