

Golf stands at a crossroads.

Old models are breaking down.

Golf often consumes too many resources for too few benefits.

In its current form, the game is unsustainable.

The road we choose will make all the difference . . .

This presents a wonderful opportunity to reimagine what golf can become

The Task Force has identified a beautiful and inclusive path forward which IS sustainable

If anyone doubts whether or not golf parks can promote equity, positive ecological outcomes and public enjoyment for a variety of activities and participants, they should look to the game's past.

Golf in Scotland:

is the National Pastime enjoyed by golfers of all abilities, genders, and ages

is Ecologically Sustainable

is Financially Sustainable

is played on Common grounds and enjoyed by golfers and non golfers alike

Too often competing interests lead to zero sum outcomes where there are winners and losers. Golf Parks provide an opportunity to bring communities together with Win-Win solutions. The Task Force has provided a roadmap for a Win-Win solution. My wife and I would like to support community stakeholders to make Glenway a Win-Win solution for the entire Madison Community.
