Hey, I just wanted to reach out in support of the proposed improvements to Whitney Way!

These alterations would be an amazing step forward to an area with a lot of potential for alternative transport growth. Whitney Way is absolutely massive roadway with plenty of room to share. Allocating this space for safer bike/ped use would be game changing for our family and others on the west-side. It would make accessing Hyvee area and other near west locations like Sequoya commons a lot simpler/safer!

- Adding a **buffered bike lane** from Old Middleton Rd to Tokay Blvd (YAY!!!!)
 - This will require the removal of all the on street parking from Sheboygan to South Hill Dr
 - (a big win for a small sacrifice)
 - OMG, I'm not crying you're crying! We're all crying tears of joy!
- Pedestrian improvements including:
 - Old Middleton Rd – Adding high visibility crosswalks
 - This would be great!!!!
 - Langlois St – Adding a pedestrian curb ramp and install a high visibility crosswalk
 - Less familiar with this intersection but love the island!
 - Door Dr – Adding new crosswalks
 - Perfect! This is the secret ped route to/from Hilldale!!!
 - South Hill Dr – Adding a rapid flash beacon crossing on the south side of the intersection and add a high visibility crosswalk
 - OMG! It's like you're following me around when I run errands!!!
 - Tokay Blvd – Adding high visibility crosswalks
 - Yes, perfect!
- Lowering the speed limit on Whitney Way to 25mph
 - This has to be the biggest deal of all these potential changes!!!!
 - Lower speed means so much to people less comfortable biking on the roads today

Please I urge you to strongly consider adopting these changes! I think the west side is poised to drop some amazing changes/development in the years to come and making those changes sustainably and accessible to all is going to make a big difference in whether we sit in traffic or can enjoy our incredible city and communities!!
