Title

Warner Park Community Recreation Center Expansion Project Update

Body

In 2015, Parks led a community-wide envisioning session for future improvements to Warner Park and the community center. Engagement outcomes focused on expanding the facility for additional community and event programming space. In 2017, Parks worked with an architectural team to assess the existing building and explore expansion opportunities. The study provided multiple expansion options, including the potential addition of a second gymnasium. The current Capital Budget includes funding for design of an expansion. The City released a Request for Proposals (RFP) on May 5, with a focus on hiring a multi-disciplinary consultant team to lead community engagement and the design of the building expansion.
