Fiscal Note

This resolution makes several needed technical adjustments to the 2009 capital budget for Engineering related projects. One set of adjustments transfers \$948,000 of unspent 2007 debt proceeds among various capital projects to allow the use of these available funds for previously approved purposes in compliance with Federal arbitrage regulations. Another section rebalances budgets where actual project revenues exceeded budget estimates. The final section removes budget authority that relates to the federal and state share of capital projects where these revenues and related expenditures are not recorded in the City's financial system.

No additional G.O. borrowing is required. For the Stormwater Utility, there is a reduction in GO for 2009 of \$204,930.

There is no anticipated impact upon the tax levy or cost controls.
