Title

Update to the Request from Madison Metropolitan Sewerage District for the installation and maintenance of a sanitary line through Reindahl Park.

Body

Update to the Board of Park Commissioners regarding the request from the Madison Metropolitan Sewerage District (MMSD) for the installation and operation of an MMSD sanitary sewer line within a portion of Reindahl Park located at 1818 Portage Road and 3909 East Washington Avenue. This project will install a new sanitary line running from the intersection of Highway 51 and Reider Road, to the intersection of Lien Road and Thierer Road as shown in Alternative 3. The new line will increase capacity and boost resiliency of the district's wastewater collection system.

MMSD is working with Parks staff to provide improvements to the park as part of this project. A paved path that builds on the Park's planned path is being proposed for the interceptor corridor. The path will act as both a recreational path for the public and also provide periodic access for MMSD to perform maintenance activities. All areas of the park will be restored in accordance with Parks staff approval and Public Works standards.
