Title

Accepting final report and proposed solutions of West Wingra Watershed Report

Body

Engineering is bringing the completed watershed study before the Golf Sub-Committee. Watershed Studies will be completed for the City's 22 watersheds over the next 5-10 years. This study is called the Wingra West Watershed Study. The Wingra West Watershed is located on the west side of the City of Madison. The Watershed Study Report describes the methodology, approach, and results of the watershed study.

Of particular note to the Golf Sub-Committee will be the impacts to Odana Golf course for the Proposed Odana Golf Pond and Odana Pond modifications. The proposed solution, expands the footprint of the ponds, lowers water levels and moves sanitary sewers on the golf course.
